### Northampton College

Northampton College serves the community and businesses in Northampton, Daventry and nearby towns and villages in the south and west of the county.

It offers a range of full-time and part-time courses across a number of levels, academic subjects and vocational areas, as well as offering local employers a range of training services through the Business Centre which was launched in January 2006.

Denford have supplied the following equipment to the College: Cyclone Lathe Triac VMC Milling Machine Mitsubishi Robot Linear Slide Router 2600 Pro

We made the decision over 7 years ago to equip our engineering department with a Denford FMS system. We are now buying a CNC Router. It's great to see a British family run engineering company stay at the top of its game after 50 years and still feel you get a personal service.
