

# 14-19 ENGINEERING DIPLOMA

Last Updated Friday, 03 October 2008

Supporting the delivery of the new engineering diploma with equipment and curriculum support materials from Denford Limited

Denford Limited are a British manufacturer that offer a broad range of CAD/CAM/CNC solutions, including CNC Mills, Lathes and Routers – all of which are available with metal cutting capability. Denford also offer 3D Printers, Laser Cutters, 3D Scanning solutions, and Cutter/Plotters. Software solutions include 2D and 3D CAD/CAM software, including SolidWorks, which can be used to design both simple and complex 3D objects.

Denford's package of CAD/CAM solutions and manufacturing machines is offered with a complete range of Curriculum Support Materials, which map the learning process to both the AQA City & Guilds and Edexcel Engineering Diploma. Denford's equipment and software solutions cover Principle Learning Units and Outcomes, and provide for the development of Personal Learning and Thinking Skills.

All Denford products are supported by a renowned Educational Support Service, together with Denford's unique On-Line Technical Forum, which offers access to Technical Support 24 hours a day, 7 days a week.

Denford are 'Proud Founders and Sponsors' of the following unique educational projects: the "F1 in Schools Technology Challenge", the "4x4 in Schools Technology Challenge" and the "GT in Schools - The Sports Car Challenge". These educational projects replicate industrial manufacturing processes employed by a number of industrial partners - including Jaguar Cars, JCB and Corus - and allow Learners to study a topic area, which extends their learning - as part of a 14-19 Engineering Diploma, or as a stand-alone qualification.

Please feel free to contact our sales department if you require any further information on any of the above, or alternatively, we would be delighted to welcome you to our 'Professional Training and Development Centre', where our full range of products are on permanent display.
